"A second electrical actuator operably coupled to said second needle valve member via a second needle control chamber, and said second closing hydraulic surface being exposed to fluid pressure in said second needle control chamber" in claim 8; and

"A second electrical actuator operably coupled to open and close said second nozzle outlet set via the second closing hydraulic surface of the second needle valve member being exposed to fluid pressure in said second needle control chamber" in claim 15 that the prior art of record neither taught nor suggested.
